

### **Policy for use of Pesticides, Fungicides, Weedicides and Fertilizers Measures**

The pulpwood species are grown as short rotation crop and most of them are exotic species in origin with non-palatability.

Hence the pest and diseases incidences are meager and most of the time not used any harmful chemicals in the plantations

SARA mandates the following policies.

1. SARA does not recommend use of any harmful chemical based Pesticides, Fungicides, Weedicides and Fertilizers in Plantation.
2. SARA is recommending only use of environment friendly Bio-Pesticides, Bio-Fungicides, Bio-Weedicides and Bio- Fertilizers in planation.
