Publicly Available Information Policy

It is with great pride that we share information with the public regarding sustainable forestry and the way we do things at SARA through posters, training sessions, motivational lectures, general meetings & information leaflets. This will not only help us to maintain and improve the Farm-Forest Division image but also will be setting a healthy trend for whoever is interested in going GREEN – environmentally friendly and sustainable forest management.

This information will be updated **annually** or as and when necessary

The following information is to be made available through circulars and notices:

1. The management (FMU) policy about sustainable farm forestry
2. Long term goals for Farm management
3. Contractual farming site maps.
4. Annual harvested volumes (in m³) in total.
5. Changes made to the Farm Management Plan of SARA on 5 year basis.
6. Changes made in the list with sensitive sites or management of these sites
7. Any other information helpful towards image building and customer relations and community welfare.

Dandeli
