

Wood Tracking Policy

SARA plantations comprised of **6 divisions** managed around **8000** Ha in extent and the systems adopted in managing the farmland are in conformity to the requirements of FSC®.

We are committed to maintain records from harvesting up to the delivery of wood to our yard or depots and all the operational processes are closely monitored and recorded.

The following details are maintained to meet the above goals.

- SARA maintains all the plantation operation details, same is to be furnished along with harvested wood.
- Yard should segregate as FSC® FM wood based on the above documents submitted.
- The local field staff should provide plantation detailed report including farm geo-location which should be provided with vehicle carrying FSC® wood along the farmers RTC, forest pass and other documents.

The following details are maintained.

Wood species, Volume, Log or Block numbers, Weather FSC® or non FSC®, Date, Vehicle and transport Details. (FSC® FM received wood added to the credit control chart and issued as per requirement)

Any changes to this policy will be at the discretion of the Managing Committee of SARA, in consultation with the relevant authorities.
