Wood Tracking Policy

SARA Groups comprised of 9 SECTIONS managed around 8000 Ha in extent and the systems adopted in managing the farm land are in conformity to the requirements of FSC.

We are committed to maintain records from harvesting up to the delivery of wood to our warehouse or depots and all the operational processes are closely monitored & recorded.

Following details are maintained in order to meet the above goals.

- The records kept at the gates shall have two columns indicating different variety: SARA **logs**. All summaries or totals made from these records should be able to show quantities/varieties separately.
- Same details shall be available for verification on a daily and month-end stock verifications.
- Arrangements shall be made for "visual separation" of the wood in the timber yard and in timber sheds.

Following details are maintained.

Wood species, Volume, Log or Block numbers, Weather FSC or non FSC, Date, Vehicle & transport Details

Any changes to this policy will be at the discretion of the Managing Committee of SARA, in consultation with the relevant authorities.

Dandeli

CHAIRPERSON/DIRECTOR
